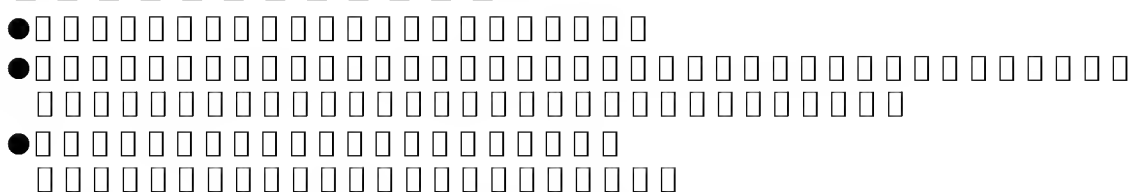

Diagram illustrating the correct and incorrect connection of a power supply to a circuit.

Correct Connection (Left): A power supply (15A, 100V) is connected to a circuit. The circuit includes a switch and a load.

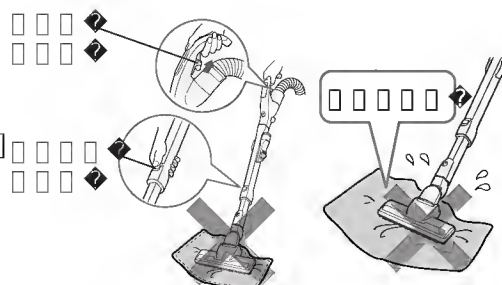

Incorrect Connection (Right): A power supply (15A, 100V) is connected to a circuit. The circuit includes a switch and a load.

- The diagram consists of two parts. The left part shows a graph with 10 nodes (represented by black dots) and 8 edges (represented by lines). Below it, the text says 'n = 10, m = 8'. The right part shows a graph with 10 nodes and 12 edges. Below it, the text says 'n = 10, m = 12'. This illustrates that the number of edges (m) can be less than, equal to, or greater than the number of nodes (n).
